

Statistical release

The latest provisional monthly energy production, trade, consumption and prices statistics produced by the Department for Energy Security and Net Zero were released on 28 March 2024.

Energy production, trade and consumption statistics are provided in total and by fuel and provide an analysis of the latest 3 months data compared to the same period a year earlier. Energy price statistics cover domestic price indices, prices of road fuels and petroleum products and comparisons of international road fuel prices.

Energy production, trade and consumption

Highlights for the 3-month period November 2023 to January 2024, compared to the same period a year earlier include:

- **Primary energy consumption in the UK on a fuel input basis fell by 0.2%, with higher energy and other prices a key factor in reduced consumption levels. On a temperature adjusted basis consumption rose by 0.5%. ([table ET 1.2](#))**
- **Indigenous energy production fell by 8.5%, due to falls in all fuels except bioenergy & waste, wind and solar. ([table ET 1.1](#))**
- **Electricity generation by Major Power Producers down 5.2% with coal down 11%, gas down 11%, nuclear down 21%, but renewables up 5.8% to a record high level due to record generation from wind.* ([table ET 5.4](#))**
- **Renewables provided 48.9% of electricity generation by Major Power Producers, with gas at 35.3%, nuclear at 13.0% and coal at 2.0%.* ([table ET 5.4](#))**
- **Low carbon share of electricity generation by Major Power Producers up 2.6 percentage points to 61.9%, whilst fossil fuel share down 2.6 percentage points to 37.5%.* ([table ET 5.4](#))**

*Major Power Producers (MPPs) data published monthly, all generating companies data published quarterly.

Energy prices

Highlights for March 2024 compared to February 2024:

- **Petrol up 3.2 pence per litre and diesel up 3.3 pence per litre. ([table QEP 4.1.1](#))**

Data periods and coverage

Statistics on monthly production, trade and consumption of coal, electricity, gas, oil and total energy include data for the UK for the period up to the end of January 2024.

Statistics on average temperatures, heating degree days, wind speeds, sun hours and rainfall include data for the UK for the period up to the end of February 2024.

Statistics on energy prices include retail price data for the UK for February 2024, and petrol & diesel data for March 2024, with EU comparative data for February 2024.

Next release

The next release of provisional monthly energy statistics will take place on Thursday 25 April 2024.

Data tables

To access the data tables associated with this release please click on the relevant subject link(s) below. For further information please use the contact details provided.

Please note that the links below will always direct you to the latest published data tables. If you are interested in historical data tables, please contact DESNZ (energy.stats@energysecurity.gov.uk).
